Capacity is limited. Register by April 22!

WEBINAR: INDOOR AIR QUALITY IN THE WORKPLACE

Providing a safe workplace for our "new normal"

Indoor Air Quality isn't a new topic but it may be rising to the top of your mind as you consider how to protect occupant health as your employees return to the workplace. During this webinar we will discuss the role that air filtration can play in preventing airborne contaminants and disease. While this may seem simple, it is important to balance the best filtration while protecting motors and other components of your HVAC system.

Featuring guest speakers:

Russ Borst, Owner, Hurst Mechanical

Jeff Popma, Certified Air Filter Specialist, Hometown Filter
